

Chimica and **CBNB** provide chemistry and chemical engineering researchers the up-to-date, trustworthy news and information they need to achieve successful results.

Chimica

A bibliographic database designed specifically for chemistry and chemical engineering research, Chimica indexes over 35 years of the most influential, international chemistry journals. Weekly updates ensure the database stays abreast of the latest developments in the field.

Coverage Includes: inorganic chemistry, organic chemistry, applied chemistry, analytical chemistry, chemical engineering, general chemistry

Chemical Business NewsBase (CBNB)

The leading provider of worldwide chemical business news, CBNB offers a range of valuable, timely information. It includes financial and business data from influential chemical companies, the latest chemical industry R&D news, intelligence on current and upcoming changes to government legislation, and analysis of economic trends.

Engineering Village

Chimica and CBNB are available on the award-winning Engineering Village research platform. This dynamic, user-friendly search environment provides accurate, reliable results with intelligence and insight to help researchers make sense of what they find and apply it to their work.

Quick Facts

Chimica

- Over 2 million records from 1970-present
- Over 500 international chemistry journals
- Updated weekly

CBNB

- Over 300 core trade journals, newspapers, and company newsletters
- Hundreds of books, market research reports, annual and interim company reports, press releases, and other "grey literature" sources
- Updated daily

Why access Chimica and CBNB on Engineering Village?

- Easy-to-use search options for users of all levels
- Features that facilitate collaboration, such as record tagging and groups
- Time-saving tools like faceted results and customizable alerts
- Combined searching with other key information sources, including: Compendex, Inspec, Ei Patents, Referex, NTIS, GeoBase, PaperChem, EnCompassLIT&PAT
