

EnCompassLIT™ is the most targeted bibliographic database available for the downstream petroleum industry. All records on EnCompassLIT™ are handpicked by experts and are uniquely indexed based on the EnCompass Thesaurus for accurate, relevant results.

What is EnCompassLIT™?

EnCompassLIT™ is a bibliographic database specifically devoted to covering technical literature published worldwide on the downstream petroleum, petrochemical, natural gas, energy and allied industries. Upstream coverage focuses solely on oil field chemicals. The EnCompass Thesaurus facilitates precision searching via controlled vocabulary, meaning that all records in EnCompassLIT™ are specially indexed for accurate, relevant results.

What is Engineering Village?

Engineering Village is a research platform that provides its users with credible, reliable results through unique search technology. By giving the user intelligence about the information being researched, Engineering Village delivers comprehensive and trustworthy data upon which sound decisions can be based.

Why should I use EnCompassLIT™ on Engineering Village?

The combination of the specialized indexing of EnCompassLIT™ and the powerful search technology of Engineering Village means that users will have the tools they need to succeed. Facted searching, multiple search options, tagging, creating groups, RSS feeds and email alerts are some of the key features that make Engineering Village the leading provider of online engineering research. The integration of EnCompassLIT™ allows users to combine their searches with other key information sources, including EnCompassPAT™, Compendex, Inspec, Referex, NTIS, GeoBase, and PaperChem. For more information on EnCompassLIT™ and Engineering Village, or to set up a training session, contact your account manager.

EnCompassLIT™ Quick Facts

- Contains over 860,000 records
- Coverage dates back to 1964
- More than 25,000 records added annually

EnCompassPAT™ is the most authoritative patent database available for the downstream petroleum industry. All patents are specially selected by experts and indexed based on the EnCompass Thesaurus for accurate, relevant results.

What is EnCompassPAT™?

EnCompassPAT™ is a patent database uniquely devoted to covering worldwide patents on the downstream petroleum, petrochemical, natural gas, energy and allied industries. Patents indexed are selected from 40 international patenting authorities. The EnCompass Thesaurus facilitates precision searching via controlled vocabulary, meaning that all patents on EnCompassPAT™ are specially indexed for accurate, relevant results.
