

EnCompassPAT

EnCompassPAT is a patent database focused exclusively on discoveries related to the petroleum refining, petrochemical, natural gas, and related energy industries. EnCompassPAT gives researchers the information they need to monitor and track competitor filings to stay up-to-date and prevent against duplication of effort.

Each patent on EnCompassPAT is selected and indexed by downstream petroleum experts using relevant terms from the *EnCompass Thesaurus*. Weekly updates ensure that researchers are aware of the latest patent filings.

EnCompassPAT Bulletins

Weekly and monthly bulletins are available in a variety of areas for PAT customers. Sent via email in PDF or HTML format, these short abstracts of recently added records in a particular subject area make it easy to keep current on industry patent activity.

EnCompassPAT Quick Facts

- Contains more than 560,000 patent records
- Features patents from over 40 patenting authorities around the world
- Indexing using over 7,000 terms from the *Encompass Thesaurus* makes information retrieval easy and precise

EnCompassPAT Bulletins subject areas include:

- Catalysts/Zeolites
- Chemical Products
- Environment Transport and Storage
- Fuel Reformulation
- Oilfield Chemicals
- Petroleum Processes
- Petroleum and Specialty Products
- Petroleum Substitutes
- Tribology

"In times of passion I have said that I cannot live without these files; and certainly I could not do my job nearly as well without them."

– Senior Information Analyst,
Large Integrated Oil Company
